PROFILE SUMMARY

Data Science student with hands-on experience in **data analytics, machine learning, and data engineering workflows**. Skilled in **Python, SQL, and Streamlit** for EDA, data cleaning, feature engineering, and building AI-driven dashboards for decision-making. Author of **2 SSRN research papers** with 400+ combined views. Holds **Microsoft Azure AI Fundamentals (AI-900)** — Score: **964/1000** and **Oracle Cloud Infrastructure Generative AI Professional** — Score: **82%** certifications.

EDUCATION

Vellore Institute of Technology (VIT) 2022 – 2027
Integrated M.Tech in Computer Science & Engineering (Data Science) | CGPA: 8.06 / 10 Vellore, Tamil Nadu

EXPERIENCE

Data Analyst Trainee Aug 2025 – Sep 2025
MedTourEasy Remote

- Developed a machine learning predictive model using **Python** to forecast blood donation likelihood from historical data.
- Performed data cleaning, transformation, and EDA to prepare and validate datasets for model training.
- Analyzed datasets using statistical methods and classification algorithms to improve blood supply planning strategies.
- Designed interactive Streamlit dashboards to communicate analytics insights to cross-functional stakeholders.

AI & Machine Learning Intern — Azure AI Program Jun 2025 – Jul 2025
Microsoft Initiative | Edunet Foundation | AICTE Remote

- Developed a Parkinson's Disease prediction model using SVM with Python and Scikit-learn on biomedical voice datasets.
- Performed data preprocessing, feature scaling, and train-test splitting; built a predictive ML pipeline achieving **~87% classification accuracy**.
- Utilized Python, NumPy, Pandas, and Scikit-learn for model development, evaluation, and performance benchmarking.

SKILLS

- Programming:** Python, SQL, JavaScript, Dart
- Data & Analytics:** Data Cleaning, Transformation, Integration, Validation, Exploratory Data Analysis (EDA), Statistical Analysis
- Machine Learning:** Predictive Modeling, Feature Engineering, Classification Algorithms, Support Vector Machine (SVM), Scikit-learn
- Tools & Visualization:** Pandas, NumPy, Tableau, Power BI, Streamlit, Jupyter Notebook
- Cloud & Databases:** Firebase (Auth, Firestore), AWS, Azure AI Services, MySQL, Git
- Soft Skills:** Analytical Thinking, Attention to Detail, Cross-Functional Communication, Problem Solving, Teamwork

PROJECTS

SmartShelf — Smart Expiry & Inventory Monitoring System 2024
Python, Streamlit Live Demo

- Engineered a real-time expiry and inventory monitoring system with automated near-expiry alerts, reducing simulated wastage by **20%**.
- Built interactive Streamlit dashboards to visualize stock levels and expiry timelines; implemented data validation for reliable analytics outputs.

Employee Data Insights — Chat-Based Analysis App 2024
Python, LangChain, Streamlit, Gemini API GitHub

- Built an AI-powered analytics app enabling natural-language and voice queries over structured CSV datasets using Gemini Pro and LangChain.
- Integrated speech recognition for hands-free data exploration; optimized prompt pipelines for rapid, accurate AI-driven insight generation.

Video Streaming Web Platform (YouTube-like) Jun 2024 – Jul 2024
React, Firebase Live Demo

- Developed and deployed a full-stack platform with Firebase Authentication, Firestore database, and dynamic content loading for **100+** video entries.
- Improved platform performance and UX using lazy loading, responsive UI patterns, and optimized component rendering in React.
